

ParkFinder

The idea behind the ParkFinder app is simple: there are numerous underutilized city parks and playgrounds in the Seattle area. Why not provide a simple app to help people find new places to play? Since this is a beginner's course, the scope was scaled back to simply be: "5 Nice Parks Close to Kirkland, WA"

ParkFinder is generally targeted to people who don't want to spend a lot of time digging around to find nice place to take the kids on a sunny afternoon. As such, the UI should be clean and have important information and actions clearly visible to the user. There will be a simple card display of nearby parks, and clicking on a card will show you more detailed information. Google Maps integration and Turn-By-Turn Navigation will also be included to make it easier to get to the parks.
